

INWALL TUNDISH APPLICATIONS>PPT

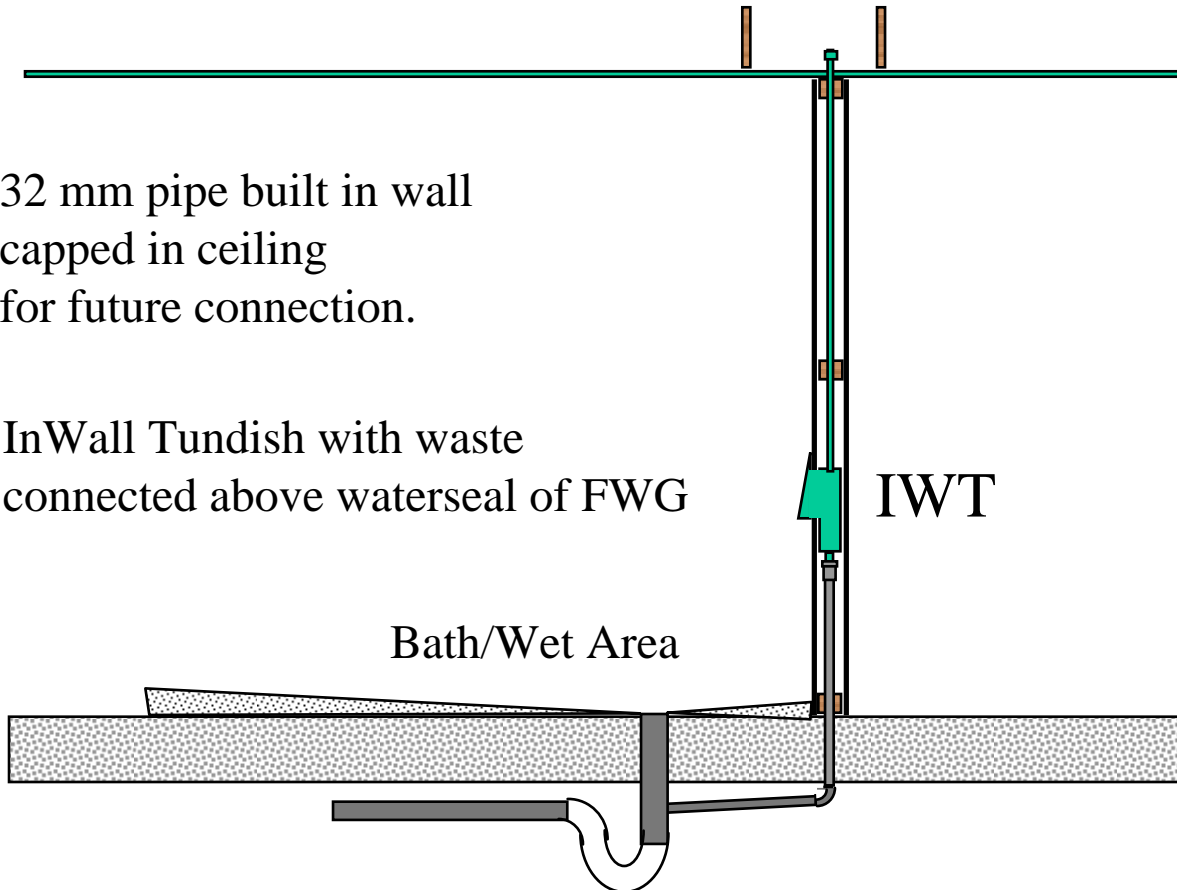

InWall Tundish Applications

- A. Connected to Wet Area Floor Waste Gully
- B. Built Into Toe Space. Overflow to Floor.
- C. Built Into Wall. Overflow to Sink Top.
- D. Built into Duct or Wall. Overflow to Sink top.
- E. Built into Wall. Overflow to Floor.

32 mm pipe built in wall
capped in ceiling
for future connection.

InWall Tundish with waste
connected above waterseal of FWG

Inwall Tundish

Set up for Current or Future AC Wastes
in shopping & office tenancies etc.

Additionally; discharging to an above sink
mounted IWT is also ideal, as the sink has a *live* trap.
